

ULTRA HIGH PERFORMANCE SUV TYRE

ATREZZO ZSR SUV

PERFORMANCE RATINGS:

ATREZZO ZSR SUV

Special Tread Compound

The tread formula effectively improves wet driving capabilities and rolling resistance for improved fuel efficiency.

Asymmetric Pattern for Balanced Performance

The asymmetric pattern design boasts two strengths; the inner sidewall is adept at draining water to increase wet performance, and outside sidewall with its large tread blocks improves grip while cornering.

High Speed Performance

Widened tread surface design; when in contact with the ground the specially structured crown evenly distributes force to achieve precise control at high speeds.

Comfortable Ride

Groove pattern improves driving stability and works with the optimised variable pitch arrangement to reduce noise emissions.
