

Issue 7 – February 2012

Sailun adds new sizes to winter tyre range

Sailun have announced an expansion in the number of sizes available – 15 more have been added in total - for the studdable Ice Blazer WST1 winter tyre and the studless Ice Blazer WSL2 winter tyre.

The new sizes are available across both patterns and cover the 15, 16, 17 and 18 inch options. The new sizes will be released from production in April and May 2012. These additional sizes enhance the Sailun winter tyre offering.

Ice Blazer WSL2

The Ice Blazer WSL2 offers the following features:

- 🌀 Directional tread design with curved grooves keeps the tread clean to deliver exceptional traction
- 🌀 Wide profile delivers excellent handling and improved road feel for all weather conditions
- 🌀 Rubber compound - branded with the “Mountain / Snowflake” symbol. The WSL2 is engineered with special “severe snow service” compounding for all winter conditions
- 🌀 Strategically positioned siping and grooves provides superior traction while maintaining good lateral stability

Ice Blazer WST1

The Ice Blazer WST1 offers the following features:

- 🌀 Directional Tread design with curved grooves keeps the tread clean to deliver exceptional traction

- 🌀 Studdable - enhanced traction provided by a well distributed series of 12 stud rows
- 🌀 Wide profile delivers excellent handling and improved road feel for all weather conditions
- 🌀 Rubber Compound - branded with the “Mountain / Snowflake “symbol. The WST1 is engineered with special “severe snow service” compounding for all winter conditions
- 🌀 Strategically positioned siping and grooves provides superior traction while maintaining good lateral stability

Ice Blazer WST2 LT

Zigzag Sipe Arrangement
Aggressive zigzag sipes engineered for excellent directional grip on snow and ice

Angled Grooves
Effectively helps to evacuate slush and water to maximise grip and control

Variable Pitch Sequence
Optimised to ensure a quiet and smooth ride

The Ice Blazer WST2 LT offers the following features:

- 🌀 Zig-zag sipe design that delivers exceptional wet traction and superior winter performance
- 🌀 Deep circumferential and lateral grooves efficiently evacuates slush and water from the tread area
- 🌀 Silica enhanced rubber compound for improved wet and snow traction
- 🌀 Variable pitch sequence delivers a quiet, smooth ride
- 🌀 Solid centre rib improves stability
- 🌀 Optimised stud pin hole design provides greater number of studs for superior ice traction
- 🌀 Carries the Severe Service Symbol (RMA Mountain Snowflake icon)
- 🌀 M and S Rated
